Learning Skills Check-Up

Student Name: **Ankita Vyas**	Grade: UKG
School Name: Sunbeam Suncity School, Varanasi	Division: A

Learning Ease Score

63 / 100

Green	Learning looks mostly smooth
Amber	Some support can help
Red	High-priority signs seen at home

Higher score = smoother day-to-day learning readiness

Your Learning Skills Snapshot (8 Areas)

A quick view of 8 everyday readiness areas based on your home observations.

Learning Skills	Support Status
1) Trying & Figuring Out	Doing Well
2) Focus & Calm	Support Required
3) Remembering Instructions	Needs Attention
4) Starting & Finishing	Needs Attention
5) Strong Sitting & Steady Body	Support Required
6) Moving with Confidence	Needs Attention
7) Using Both Sides Together	Doing Well
8) Sharp Eyes & Smart Hands	Support Required

Learning Skills Check-Up

Detailed Explanation: **When the skill is not well developed, you may notice:**

1) Trying & Figuring Out

At home - Parents often notice: child giving up quickly, needing help immediately, not trying new ways.

In school - It can affect tasks like: puzzles, matching, building blocks, simple do-it-yourself tasks.

In the classroom - It may look like: child avoiding new activities, needing constant adult help, low confidence in learning games.

2) Focus & Calm

At home - Parents often notice: child cannot stay with one activity, needs repeated calling, big meltdowns, difficulty waiting turn.

In school - It can affect tasks like: circle time, listening to stories, following teacher directions, sharing.

In the classroom - It may look like: child missing instructions, frequent reminders, difficulty settling, behaviour complaints.

3) Remembering Instructions

At home - Parents often notice: child forgets 2-step instructions, forgets mid-task, needs immediate repetition.

In school - It can affect tasks like: take your bottle and sit, pack up and line up, action songs.

In the classroom - It may look like: child not completing tasks, confusion in routines, slower learning of rhymes and sequences.

Detailed Explanation: **When the skill is not well developed, you may notice:**

4) Starting & Finishing

At home - Parents often notice: child does not start without help, leaves tasks unfinished, misplaces items, struggles with routines.

In school - It can affect tasks like: completing a craft, cleaning up, following daily routines.

In the classroom - It may look like: child leaves unfinished work, messy belongings, difficulty transitioning between activities.

5) Strong Sitting & Steady Body

At home - Parents often notice: child slouching, hand tired quickly, cannot sit steady, clumsy indoors.

In school - It can affect tasks like: colouring, drawing, pre-writing strokes, sitting for story time.

In the classroom - It may look like: child has low table-work stamina, messy/slow pre-writing, constant shifting on the chair.

6) Moving with Confidence

At home - Parents often notice: child avoids running/jumping, struggles with hopping/balance, tires quickly, falls often.

In school - In preschool, it can affect tasks like: playground participation, group games, confidence in movement.

In the classroom - It may look like: child avoiding PE/play, low confidence, difficulty with movement-based learning games.

Learning Skills Check-Up

Detailed Explanation: **When the skill is not well developed, you may notice:**

7) Using Both Sides Together

At home - Parents often notice: child struggles using two hands together, difficulty with buttons/zips/shoes, frustration in fine tasks.

In school - It can affect tasks like: scissors, tearing/pasting, beads, opening lunch boxes, dressing independence.

In the classroom - It may look like: child has slow craft work, difficulty managing materials, reduced independence.

8) Sharp Eyes & Smart Hands

At home - Parents often notice: child having poor catching/throwing/aiming, spills, difficulty tracking books/pictures/lines.

In school - It can affect: activities like ball play, pouring, stacking/placing tasks, early book handling and visual tracking.

In the classroom - It may look like: child having difficulty copying simple shapes, messy colouring within space, reduced readiness for reading/writing later.
